Experience

Aelum Consulting

May 2025 – Present

Wordpress Developer

Jaipur, Rajasthan

- Responsible for building dynamic web pages using **WPBakery** and developing custom backend functionality with PHP, **shortcodes**, and **AJAX** to enhance **site performance** and interactivity.
- Migrated** existing pages and entire websites between WordPress environments, **ensuring data integrity**, theme compatibility, and minimal downtime during deployment.
- Created **custom PHP** shortcodes and theme functions to render **dynamic content**, **functionalities** and enhance backend capabilities.

IMS People Possible

July 2023 – Dec 2024

Wordpress Developer

Jaipur, Rajasthan

- Developed and customized **PACER**, a WordPress theme providing a detailed repository of hospitals across the United States, optimizing the theme's layout and user experience for each unique instance.
- Pacer frontend developed from **html widgets**, CSS, and **JavaScript** to create dynamic, **responsive** layouts, and **custom post** types.
- Plugin** development enables tailored features, enhancing PACER's scalability and user experience,
- Built custom WordPress backend using **PHP**, **shortcodes**, and **REST API integration**; developed theme-specific functions for dynamic content and form handling.

SRV IT Solutions

May 2022 – July 2022

Frontend Developer

Kota, Rajasthan

- Built Tourism portal using **React JS** with seamless interaction of **REST APIs** using **AXIOS** optimized with React Query

Projects

Portfolio Website | ThreeJs, ReactJs, RestFul API, Netlify

October 2024

- A 3D portfolio website using **ReactJS** and **THREE.js** provides an interactive, immersive user experience by integrating complex **3D** models, animations, and effects into a React component structure.
- THREE.js handles real-time rendering of 3D objects, lighting, and textures, while ReactJS manages component states, user interactions, and efficient updates for a smooth, high-performance interface.

Podstream App | ReactJs, NodeJs, MongoDB, ExpressJs

August 2024

- Podstream is a **full-stack** web application enabling users to pause and resume podcasts seamlessly.
- Built with React for the Front End, **Node.js** for the backend, **MongoDB** for data storage, **Google Auth** for secure user login, and Firebase for real-time updates, it uses **RESTful APIs** to streamline streaming, boosting efficiency by **35 percent**.
- Utilized the layout editor to create a **UI** for the application to allow different scenes to interact.
